

MAYOR'S MESSAGE

Paulina Flint

The Greater Salt Lake Municipal Services District (MSD) serves 85,677 residents residing in five metro townships, one town and unincorporated Salt Lake County.

Our mission is to provide quality, innovative and cost-effective municipal services to meet the present and future needs of the distinct communities we serve.

White City: Mayor Flint's Message

Dear White City Residents,

I wish to thank the residents for helping with the massive one time "Fallen Tree Limb" event. We wish to thank the volunteers: Greg Shelton, Kristy Shelton, Scott Teron, Phil Cardenaz, Chasse Cardenaz, Isaiah Cardenaz, Renee Christensen, Allan Perry, Aron Flint Mathew Flint, Mike Wilde, Wendy Flint, Paulina Flint, Xzavier Gonzales & friends? Ned Campbell, Jordan Huntzinger, Lina Barkey, Bill Flint.

We removed over 56,000 lbs.

For continued assistance please contact:

This would not have been possible without the assistance of Wasatch Front Waste & Recycling's Pam Roberts and her excellent team.

We also have vouchers available if you need to go to the dump. Contact your council members.

White City Metro area cleanup with be July 26th – August 1st.

Planning Commission Vacancies

We currently have 2 vacancies. Vacancies available for Planning Commission Members apply online at: <https://www.whitecity-ut.org/forms>

Submit by May 26th.

Sego Lily Drive Improvements: (Out to bid)

The Sego Lily Drive project includes a new curb, gutter, and sidewalk on both sides of the road from 700 East to Flint Drive. It also includes several traffic calming features, including bulbouts at crosswalks and a raised crossing at the canal trail. Additional drainage features will be added. The road will be resurfaced with new asphalt and street lighting will be provided from 700 East to 1300 East. The finished road will include bike lanes and parking shoulders. Work is expected to begin this summer and will be complete before the end of the year. Go to Whitecity-ut.org to view slides below (1of4)

Ski Connect Phase 2:

Phase 2 of the Ski Connect Sidewalk project includes constructing a new sidewalk on the east side of the road from 9400 S north about 135' to connect to existing sidewalk. A new ADA compliant pedestrian ramp will be constructed at the northeast corner of Red Haven and 9400 S. This project will begin this summer and take approximately 60 days to complete.

White City Canal Trail Lighting:

We will be placing outdoor lighting on the canal trail from Larkspur Drive to Carnation Drive. Wood poles with overhead lights will be placed approximately 150 ft to 200 ft apart for this stretch of trail. This is part of an effort to provide lighting along the full length of the canal trail through White City. As

additional funding is available, additional segments will receive lighting.

Onyx Lane Sidewalk:

White City received notification that it would receive federal funding for sidewalk along the north side of Onyx Lane. The intention is to build the sidewalk from the pass-through walkway west of Garnet, to Big Bear Park. This will provide a safe walking path for students and others heading to the school or park. Funding has not been received yet, but initial planning has started, and it is likely the sidewalk will be constructed in 2024. Affected residents adjacent to the sidewalk will be contacted as the design progresses.

Legislative Update HB 374 Our Policing into the Future!

It is important to understand our Police service for Metros, Town of Brighton, and the remaining Unincorporated is brought to you via an Independent Service District, much like White City Water District.

Salt Lake Valley Law Enforcement Service Area (known as SLVLESA) Population over 85,000 people. When combined with the 3 municipalities of Mill Creek, Holliday, and Midvale, as the Unified Police Department, our population exceeds 220,000 people. All our attorneys are in the process of working together to preserve the excellent Policing Service we have always enjoyed.

White City

EVENTS

Saturday, June 17
5K Race @ Bear Park - 8AM

September - date TBA
Car Parade - Glacier Hills • 5PM

July 26 - August 1
White City Cleanup

September - date TBA
Plant Swap at Bear Park - 9AM-2PM

Saturday, May 20
Plant Swap at Bear Park - 9AM-2PM

Saturday, August 26

 SALT LAKE CITY, UT
 PERMIT NO. 420

What is the Greater Salt Lake Municipal Services District?

The MSD serves one town, five metro townships and unincorporated Salt Lake County

msd.utah.gov

What services does the MSD provide in your community?

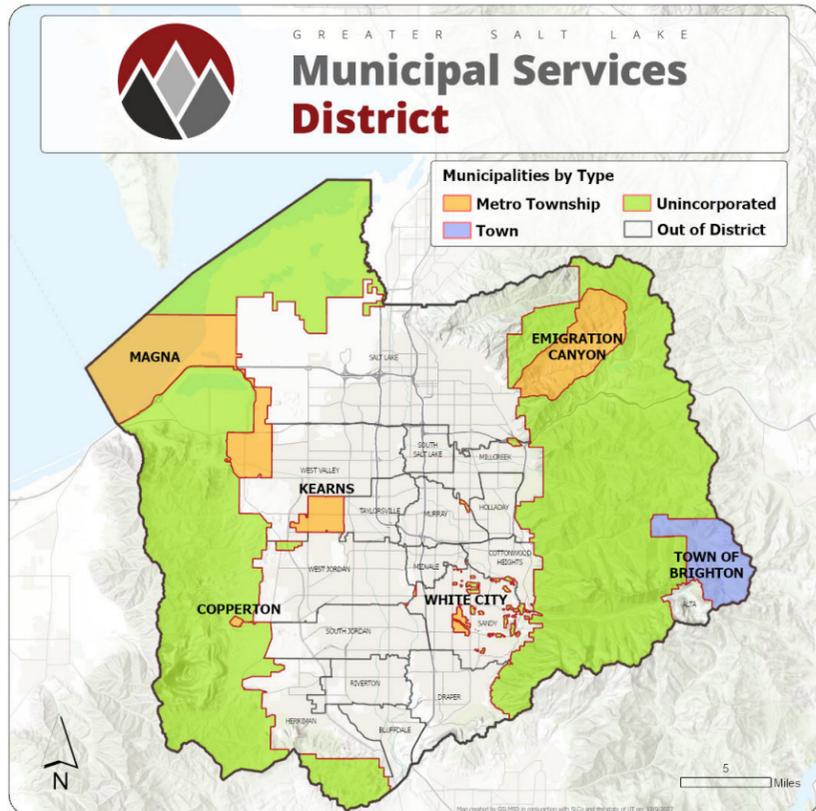

• Issues building permits and business licenses	• Conducts building and business license inspections
• Reviews plans and zoning	• Works with residents and solves code enforcement issues
• Updates and creates maps and interactive maps - GIS services	• Collects and analyzes data
• Assists in writing code, ordinances and policies	• Writes grants to obtain Federal and State funding
• Provides addressing information	• Provides innovative and cost-effective IT services
• Provides strategic planning and technical assistance	• Provides strategic planning and technical assistance
• Creates and updates General Plans and Transportation Plans - vision and opportunities	• Communicates with residents and provides outreach and engagement
• Mitigates the pollutants from storm water runoff and snow-melt	• Issues SWPPP/Grading permits

The MSD contracts with Salt Lake County to provide:

• Public Works Operations - snow removal, road projects, lighting, traffic signals, traffic calming and street maintenance	• Engineering - transportation engineering, excavation permits, special event permits
• Animal Services - adopt a pet, lost and found animals, licensing, clinic services	• Municipal Parks - reservations and rentals, park maintenance

Spring Flooding Information & Resources

Utah has experienced a much higher snow pack this year. That snowpack, along with potential spring rains, may cause high stream flows and water tables. We anticipate there will be potential flooding in areas where we do not usually see water flow.

Residents are encouraged to be aware of the potential for flooding this spring and take measures to protect areas near their home by clearing out rain gutters, downspouts and storm drains. Check your landscaping to make sure water drains away from your home.

If you need to report flooding:

- Call 9-1-1 if it is a life-or-death emergency.
- Call (801) 840-4000 if you have a non-emergency but require police or fire assistance.
- Call (385) 468-6600 if you see water from a creek or river that is going over bridges or roadways or if you see street, intersection, or parking lot flooding. The operator will ask you some questions and take down your information.
- Call (385) 468-6101 if you see flooding on a roadway that is located away from a creek or river. This is most likely a storm drain issue.

Where Can I Pick Up Sandbags?

To find self-serve sandbagging locations where you can go to get sandbags or fill and leave them for others to take, go to this link: slco.to/RunoffReady. These locations are typically open during normal business hours so feel free to go whenever it's convenient for you.

If you have used sandbags and they have been in contact with "RUNOFF" water, you can dispose of the sand in your yard and use the sand. If the sandbags have become contaminated by being in contact with service drain water from street drains or possible septic systems, the sand and the bags will have to be disposed of as hazardous material. The county is working on a plan to collect these bags. Under no circumstances are the sandbags, contaminated or uncontaminated, to be dumped into any streams, creeks, or rivers.

Is your home in a flood zone?

SLCo Flood Plain Map: msc.fema.gov/portal/home
SLCo Emergency Management: slco.to/RunoffReady
FEMA Flood Plain Map: <https://msc.fema.gov>
Utah Risk Map: <https://floodhazardsutah.gov>

What to do during a flood?

Salt Lake County Watershed Streamflow and Precipitation
<https://rain-flow.slco.org>

- Listen to the radio or TV for announcements about rainstorms and the potential for flooding. Information on floods can change quickly, so make sure that you are constantly monitoring if a flood is likely in your area.
- Move immediately to higher ground if there is any possibility of a flash flood.

- Keep children and pets away from swift, high water in rivers, creeks or canals.
- Be aware of rivers, streams, and drainage channels that can overflow and cause a flood.
- If you must evacuate, secure your home if you have time. Move essential items to the second floor of the house in case the floodwater goes higher than a few inches or feet.
- Turn off utilities before leaving the house.

What NOT to do during a flood?

- Don't turn on electricity when the house is flooded. You may get electrocuted.
- Do not drive through floodwaters. You do not know how deep the water is or how fast moving it is.
- Don't ignore flood warnings. Evacuate immediately when the order is given.
- Don't forget your emergency kit when you evacuate.

Volunteers

Salt Lake County Emergency Management has launched its **Volunteer GivePulses platform**. You can sign up to be a volunteer at countywide events. Here is the webpage:
<https://givepul.se/uei1te>

Summer Construction Projects

Copperton

Copperton Storm Drain • The purpose of this project is to design and construct stormwater drainage improvements along Park Street, Apex Road, and Copperton Circle. The design of this project is underway with construction anticipated for 2024.

SR-48 Safe Sidewalk • We will design and construct new sidewalk along the north side of SR-48 between 8662 W and 8480 W in Copperton where sidewalk does not currently exist. This is a UDOT Safe Sidewalk Program award project with associated state funds. Design of the sidewalk is in the process of being finalized and construction will start in Summer/Fall 2023.

Kearns

5615 So Concrete Repairs and Overlay • We will remove and replace damaged curb, gutter, and sidewalk sections and infills existing in unimproved or damaged park strip areas. A raised pedestrian crossing will be constructed at 4430 West. The roadway will be resurfaced with new asphalt from Northwest Avenue to 4015 W. Work began early 2023 and will be complete in May 2023.

Planada Way & Farah Drive Intersection Regrade • The intersection of Farah Drive and Planada Way has a change in slope that is too drastic for many delivery vehicles and some personal vehicles to maneuver without scraping or getting stuck. This project will regrade the roadway on Farah Drive near the intersection, including replacing the roadway surface, curb, gutter, and sidewalk. Expectation is to construct in Summer 2023, but this may change depending on cooperation of adjacent residents.

4805 S 4480 W C-Loop Sidewalk Replacement • Curb, gutter, and sidewalk will be replaced on the roadway loop off of 4420 W, including 4805 S, 4480 W, and 4835 S. This work is primarily complete, with only some landscaping work remaining. This will be complete in May 2023.

Cougar Lane Widening • Kearns received a federal grant to reconfigure a one block stretch of Cougar Lane (4800 W) between Niagara Way and the Kearns High School south parking lot entrance to alleviate congestion through this area. Conceptual designs and the environmental clearance work are just beginning. Full engineering design and right-of-way acquisition (if needed) will likely go through fall 2024 with construction in summer 2025.

4015 W, Twilight Drive to 5700 S Traffic Calming • This area of 4015 W has vehicles routinely exceeding the speed limit by more than 10 mph. This is especially problematic at this location due to the roadway geometry (S-curve), with many vehicles leaving the travel lane and using the shoulder and turn lane to navigate through the curves at high speed through this location. We will implement some traffic calming features that will make it more difficult for vehicles to leave the travel lane, which will force them to go through the area at a safer speed. Design is being finalized, with construction expected late summer into fall.

4015 W Bridge Replacement • Thanks to the efforts of Mayor Bush, the state legislature allocated money to replace the bridge over the Utah and Salt Lake Canal on 4015 W and 4715 S. The project will replace the bridge with a wider bridge or culvert, which will address the structural deficiencies of the existing crossing and allow sidewalk and bike lanes to continue across the bridge in addition to the road lanes.

White City

Sego Lily Drive • We will add new curb, gutter, and sidewalk on both sides of the road from 700 East to Flint Drive. The project also includes several traffic calming features, including bulbouts (curb extensions) at crosswalks, a raised crossing at the canal trail and additional drainage features. The road will be resurfaced with new asphalt and street lighting will be provided from 700 East to 1300 East. The finished road will include bike lanes and parking shoulders. Work is expected to begin this summer and will be complete before the end of the year.

Ski Connect Phase 2 • We will construct new sidewalk on the east side of Red Haven Drive from 9400 S north about 135' to connect to existing sidewalk. A new ADA compliant pedestrian ramp will be constructed at the northeast corner of Red Haven and 9400 S. This project will begin this summer and take approximately 60 days to complete.

White City Canal Trail Lighting • We will place outdoor lighting on the canal trail from Larkspur Drive to Carnation Drive. Wood poles with overhead lights will be placed approximately 150 ft to 200 ft apart for this stretch of trail. This is part of an effort to provide lighting along the full length of the canal trail through White City. As additional funding is available, additional segments will receive lighting.

Onyx Lane Sidewalk • White City received notification that it would receive federal funding for sidewalk along the north side of Onyx Lane. The intention is to build the sidewalk from the pass-through walkway west of Garnet to Big Bear Park. This will provide a safe walking path for students and others heading to the school or park. Initial planning has started and it is likely the sidewalk will be constructed in 2024. Affected residents adjacent to the sidewalk will be contacted as the design progresses.

Emigration Canyon

Margarethe Lane • The aim of this project is to provide increased safety and reduce maintenance by adding riprap in Freeze Creek, stabilizing the eastern embankment of the roadway, and completing a mill and overlay to Margarethe Lane, which was experiencing slope degradation thus leading to pavement failures. Riprap is a layer of large stones that protects soil from erosion in areas of high or concentrated flows. Work was completed in the fall of 2022 to stabilize the slope along the east side of the street on Margarethe Lane. Construction will begin to mill and overlay the road in late spring.

Emigration Canyon Slope Stabilization • We will improve the road and stabilize two critical slopes to provide a safer experience to bicyclists and motorists from 5167 E. to 5715 E. Emigration Canyon Road. The design of the project is being finalized and the process of acquiring necessary right-of-way easements and permits is ongoing.

Emigration Creek Flood Map Revision • This study will update the Salt Lake County Flood Insurance Study and FEMA Flood Insurance Risk Maps (FIRMs). These documents are used by a "number agencies" and local municipalities to evaluate and mitigate potential flood damages. A field survey crew will be working in the channel collecting topographic data and making observations during Spring 2023.

Magna

9130 West Sidewalk from 2600 So. to 2700 So. • This project will revitalize street improvements, including curb, gutter, and sidewalk and connect to a new improved sidewalk on 2600 South. The funding for the project is from a Community Development Block Grant (CDBG) grant and Federal funds. It is in the final stages of design and construction is anticipated to begin Summer 2023.

Cyprus Master SD Phase 2 (8800 W) • We will be constructing new and modifying existing storm drain facilities along sections of 8800 West, 9040 West, and 2810 South. This project will provide additional capacity to one of the major storm drain lines in Magna and mitigate localized flooding along those corridors. We will also install new curb, gutter and sidewalk along the west side of 8800 West between Magna Main Street and 2600 South. The construction begins in May and ends in the late fall of 2023.

2550 South Phase 2 Grading • The purpose of this project is to perform necessary earthwork preparation for future completion of 2550 S (Beagley Lane) between 8000 W and 7200 S. This project is anticipated for construction in Summer 2023.

2820 South Sidewalk • We will install new curb, gutter, and sidewalk in several sections of 2820 South (Parkway Blvd.) between 7200 West and 8000 West where it is currently missing. Some minor storm drain improvements are also included in this project. Funding for this project comes from a Wasatch Front Regional Council (WFRC) award project and Federal funds. Design of the project is being finalized with construction anticipated for Summer to Fall 2023.

3100 South Storm Drain • We will replace corrugated metal storm drain pipes and structures along 3100 South between Breeze Dr. and 8400 West to improve system resiliency and local drainage. The project is in design with construction anticipated for summer to fall 2023.

8000 West Widening • We will widen 8000 West between 3100 South and SR-201 to fit the new roadway cross-section. This project will include a new centered two-way left-hand turn lane, which will increase capacity by mitigating delays. New curb, gutter, and sidewalk will also be installed in most of the sections where they are currently missing. The project is a Wasatch Front Regional Council (WFRC) award project with associated Federal funds. Design of the project begins Spring 2023.

Unincorporated Salt Lake County

Millcreek Canyon Overlay • We will repave and widen the lower portion of Millcreek Canyon Road, from the guard shack to the winter gate, and restripe to allow for bike lanes. The majority of this work was completed last summer and fall, but additional signage and messaging will be added this spring when the snow recedes enough to do the work.

Vic's Road (8475 So), 760 E to 874 E • We will add curb, gutter, and sidewalk, and street lighting on the north side of the road. This project is partially funded through a UDOT TAP grant for safe pedestrian access. Construction will begin in May 2023 and go through the summer, with the intent to be finished prior to school starting in August.

10000 So 2700 E Safety Improvements • The school district has requested curb, gutter and sidewalk on the north side of the road from approximately 2543 E to 2700 E. We are currently still working in the design and right-of-way phase in order to find a solution that is appropriate for all affected parties.

**2023
General Election Information**

Important Dates

- June 1 to 7, 2023** - Filing Deadline for qualified municipal and metro township candidates - (Declaration of Candidacy)
- Tuesday, August 15, 2023** - Primary Election, if needed
- August 8 to 15, 2023** - Ranked choice voting filing deadline for candidates
- September 4, 2023** - Last day to qualify as a write-in candidate
- Tuesday, November 7, 2023** - General Election

Qualifications to Run for Office

- Be a United States citizen at the time of filing
- Be a registered voter of the municipality
- Be a resident in the town, township or city for 12 consecutive months prior to the election.
- Not be a convicted felon unless the right to hold elective office has been restored.

Open Seats

- Town of Brighton - Two Council At-Large seats
- Copperton Metro Township - One Council At-Large A-seat and one Council At-Large B-seat and Council At-Large C-seat
- Emigration Canyon Metro Township - Three Council At-Large seats
- Kearns Metro Township* - One Council Seat each in District 1, 3, 5
- Magna Metro Township* - One Council Seat each in District 1, 3, 5
- White City Metro Township - Three Council At-Large seats

* Magna and Kearns Metro Townships opted into Rank Choice Voting, so there will not be a Primary Election in these two communities.

Spring is here and it's time for you and your pup to roam the neighborhood, the parks, and the trails. Before you bound out of the house grab a leash and those poop bags.

LET'S GET LEASHED

btw...it's the law. AdoptUtahPets.org

Leash Laws
Many violators of this ordinance will claim that their pet is friendly, or less aggressive when on leash. But Salt Lake County Animal Services would remind you not everyone likes a "friendly" off-leash dog, nor do other dogs that are on leash. A leash is not an optional accessory, it's the LAW to use one. If you and your dog are caught being off-leash, and it's not a designated off-leash dog park, you will get a ticket and will pay a fine.

Pack Out the Poo
It's the law to clean up after your dog, if you get caught not picking up their poop, expect to pay a fine. This is another public nuisance violation. Be a considerate neighbor or hiker and carry poop bags to clean-up after your dog when they defecate out on an adventure, whether it's in the neighborhood or on a busy hiking trail, you must pick it up, pack it out and dispose of it properly.

The Laws
Curious about the ordinances in your city or township? Check out AdoptUtahPets.com and visit the "Laws" section to look up the ordinances in your area.
